**DETAILED ACTION**

1. Claims 2-24 are pending in the application. Amended claims 21-23 have been noted.

***Continued Examination Under 37 CFR 1.114***

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/31/2010 has been entered.

***Allowable Subject Matter***

3. Claims 2-23 are allowed.
4. The following is an examiner's statement of reasons for allowance: The prior art does not disclose a method of treating a substrate comprising: placing an electrically conductive substrate in a treating container maintained at a pressure of 0.1 to 1 atmospheric pressure, supplying a process gas, irradiating an ultraviolet ray having a photon energy of 3 to 10 eV to a surface of the substrate so as to emit electrons from the surface, applying a negative bias voltage to the substrate and accelerating the electrons, producing a dense plasma in the vicinity of the substrate due to repeated collisions of the accelerated electrons with the process gas, and treating the substrate with the plasma. The higher pressures used in the present invention allow the electrons emitted from the substrate surface as a result of the absorption of ultraviolet to collide

with the process gas molecules after migrating only a trivial distance from the surface to produce radicals and ions as a result of electron impact dissociation. The relatively high pressures used have the advantages of not needing ultrahigh vacuum apparatus and that a great deal of heat generated by the UV lamp is efficiently removed by the process gas (instant Spec. p. 4).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### **EXAMINER'S AMENDMENT**

5. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Hardy on 9/28/2010.

The application has been amended as follows:

Claim 8: The method for treating a substrate according to claim 21, wherein the pressure within the process chamber is maintained between ~~0.04~~ 0.1 – 0.5 atmospheric pressure.

Claim 16: The method for treating a substrate according to claim 2, wherein the pressure within the process chamber is maintained between ~~0.04~~ 0.1 – 0.5 atmospheric pressure.

Claim 17: The method for treating a substrate according to claim 3, wherein the pressure within the process chamber is maintained between ~~0.04~~ 0.1 – 0.5 atmospheric pressure.

Claim 18: The method for treating a substrate according to claim 4, wherein the pressure within the process chamber is maintained between ~~0.04~~ 0.1 – 0.5 atmospheric pressure.

Claim 19: The method for treating a substrate according to claim 5, wherein the pressure within the process chamber is maintained between ~~0.04~~ 0.1 – 0.5 atmospheric pressure.

Claim 20: The method for treating a substrate according to claim 7, wherein the pressure within the process chamber is maintained between ~~0.04~~ 0.1 – 0.5 atmospheric pressure.

Please cancel claim 24.
